

Avviso di Seminario

**VENERDI' 9 MAGGIO 2008
ore 11**

Dr. P. Bartalini
(National Taiwan University)

Terrà un seminario dal titolo:
“Multiple Parton Interactions at the LHC”

Abstract:

In order to find new physics at the Large Hadron Collider (LHC) collider it will be essential to understand the general features of the ordinary QCD processes, which turn out to be deeply affected by the possibility of having Multiple Parton Interactions (MPI) inside the same proton-proton scattering. A variety of physics measurements in the low and high P_T regimes will be performed by the LHC experiments to study the MPI processes.
